SUMMARY

Hi, I'm Dmytro, a frontend developer studying at Kharkiv National University of Radio Electronics. I specialize in intuitive web interfaces using the MERN stack, Next.js, and TypeScript. I have experience working in a team and am eager to contribute to innovative projects. Let's create something awesome together!

PROJECTS

Portfolio Website

Technologies Used:
- **Next.js**: For server-side rendering (SSR), static site generation (SSG), and routing.
- **Tailwind CSS**: A utility-first CSS framework for fast and responsive design.
- **TypeScript**: Adds type safety to JavaScript for better code quality and maintainability.
- **Vercel**: Used to host the application with seamless integration for Next.js.

Hangman

Here is a list of the technologies used in my Hangman project:
- **React** – For building the user interface.
- **TypeScript** – Ensures type safety and better developer experience.
- **Vite** – A fast build tool with Hot Module Replacement (HMR).
- **CSS** – Used for styling the application.
- **HTML** – Provides the structure of the web page.
- **JavaScript** – Additional logic or functionality, where needed alongside TypeScript.
